

People Handling and Risk Assessment Key Trainer's Certificate (Refresher/Update)

EDGE Services are one of the leading purveyors of health and safety training in the UK today. We are committed to developing your knowledge skills and confidence through professional, proven courses that have a direct impact on performance.

Course Overview

In order that trainers keep abreast of new legislation and developments in manual handling, EDGE Services recommend that you attend a 'Refresher/Update' course at least every two years. This course will further advance your professional development and manual handling skills, and provide you with a valuable opportunity to trade experience with others.

Who Will Benefit?

This two day course is designed for those who have previously attended the EDGE Services 'People Handling and Risk Assessment Key Trainer's Certificate' or similar course. If you have not been previously trained by EDGE Services you will be required to provide proof of your original qualification.

Assessment and Certification

Course assessment comprises:

- a practical skills assessment, which takes place continuously throughout the course;
- informal Q&A throughout the duration of the course.

This course is a Royal College of Occupational Therapists (RCOT) Approved Learning Award and is certified by the CPD Certification Service. Upon successful completion of this training you will receive a certificate from EDGE Services and an Advanced Level 4 award from RoSPA Qualifications. Both certificates are valid for two years.

Overview of Course Aims and Intended Learning Outcomes

By the end of the course you will:

- have been reminded of, and made aware of any relevant changes to, legislation and professional guidance which affects them, their job, their employers and employees;
- have been reminded of the principles of biomechanics and how they can be applied to the efficient movement of clients;
- have been reminded of ergonomics as a means for the reduction of manual handling injury;
- have been reminded of the importance of risk assessment;
- have been reminded of the commonly known 'controversial techniques' and why some manoeuvres have been classified as such;
- have had the opportunity to practise up-to-date manual handling techniques and to review new handling aids;
- have had the opportunity to assess practical moves using current assessment tools.

Post-Training Support

This unique service provides invaluable support to EDGE delegates after the course has finished. Our helpful trainers are available to answer any queries you may have once you return to work.
