

# Are you looking to save time on booking in of medication, reordering of monthly medication or auditing of your home?

Perhaps you'd like to reduce the risk of medication errors and feel confident about administering medicines safely?

Person Centred Software's ATLAS **Electronic Medication Administration Record System** (eMAR) is a market leading electronic medicines management system proven to increase resident safety and improve care home efficiency.

In 2022 Person Centred Software (PCS) acquired ATLAS eMAR, bringing ATLAS into the PCS family of products.

## How is eMAR used?

Care staff use a handheld device, they log in and then are able to see what medication is due per resident

Barcode Technology is used to ensure all medication rights of the resident is upheld. This ensures that the right medication and dose is being administered to the right person.

Ordering of medication becomes much easier due to the GP, pharmacies and care homes all being connected

Person Centred Software's eMAR system integrates with many other systems such as care planning, pain management and medicines information services.

# What are the benefits of using an eMAR system?

- ✓ Save hours when booking in medication
- ✓ Safe administration of medicines
- ✓ Clear instructions on how to use medicines.
- ✓ Timely administration of medicines
- ✓ Reduce the risks of medication errors.
- ✓ Continuous monitoring of resident's wellbeing

## What sets Person Centred Software's ATLAS eMAR System apart?

- Barcode technology – unrivalled accuracy
- Enhanced group reporting abilities that you won't find with other eMAR systems.
- A UK based team covering support, development & technical aspects, which are all designed to ensure our customers gain the best experience from their investment.
